Skills

- HTML5 | CSS3 | Javascript | Typescript | ReactJs | NextJs | Redux | Zustand | Tailwind | NodeJs
- MongoDB | Git | Grafana | Rest API | Clerk | Appwrite | Shadcn | Zod | HonoJs | MySQL | Nuqs | Agile
- Python | Web Scraping | Cloudflare Workers | Postman | Data Structure | OOPS | Backend | Prisma

Experience

Zairo International (Fulltime)

December 2024 - Present

- Building Vacation Saga from scratch using React Native (Expo), Express.js, MongoDB, and TypeScript.
- Developed property filtering APIs, search, and frontend UI.
- Implemented JWT authentication, bcrypt encryption, and OAuth (Passport.js).
- Designed backend schemas and optimized database queries.
- Integrated React Native Maps for real-time property locations.

Projects

Grocebay

- Building a scalable real-time grocery application using React native, Typescript, FastifyJs and Websockets (**Socket.io**) enabling instant messaging and group chats.
- Optimized backend performance with fastify, and implemented JWT-based authentication, OAuth integration.
- **Tech Stack** - React native, Typescript, Fastify, Websocket (Socket.io), Google maps,, JWT, AdminJs

Bestudent

[Source Code](#)

- Developed an **e-learning platform** with a user-friendly **dashboard** for tracking student and teacher performance.
- Enabled course uploads and milestone monitoring with **role-based access control** using **Clerk** with protected routes and authorization
- Integrated **UploadThing** for file management, **Mux** for video streaming, and **Stripe** for secure payment processing
- **Tech Stack** - NextJs, Typescript, Mux, Stripe, Clerk.

ProManage

[Source Code](#)

- Developed a comprehensive project management dashboard, enabling users to create, track, and manage tasks, while analyzing team performance, streamline workflows and adhering to deadlines.
- Designed a secure **code invitation** system for onboarding new members and integrated notifications and email updates for individuals and groups to enhance collaboration.
- Created a **Kanban-style** board for task visualization and project management using drag and drop functionality enabling team collaboration and reducing task bottlenecks by 70%.
- **Tech Stack** - NextJs, Typescript, HonoJs, Appwrite, Grafana, Shadcn, Zod, Nuqs, Tanstack

Education

- | | | |
|----------------|---------------------------------------|-----------|
| • BTech - IT | PSIT College Of Engineering | 2020-2024 |
| • Intermediate | Oxford Model Senior Secondary School, | 2018-2020 |
