SUMMARY

Full-stack engineer with 1+ year of experience developing scalable web and mobile applications using React Native, Next.js, and Node.js. Specializes in building secure authentication systems, optimizing backend performance, and delivering user-focused solutions. Passionate about crafting impactful products and thriving in high-paced engineering environments.

TECH HIGHLIGHTS

React.js • Next.js • React Native • Redux • Zustand • Tailwind • Shadcn • Node.js • Fastify • Prisma • MongoDB • MySQL • Appwrite • Stripe • Clerk • WebSockets • TypeScript • Python

EXPERIENCE

Software Engineer | Zairo International (Dec 2024 – Present)
- Built Vacation Saga from scratch using React Native (Expo), Express.js, MongoDB, and TypeScript.
- Engineered a secure authentication system with JWT, bcrypt, and OAuth, reducing login issues by 40%.
- Designed optimized backend schemas and queries, improving response times by 30%.
- Integrated property filtering APIs and React Native Maps for real-time visualization.

PROJECTS

Grocebay | GitHub
- Built a real-time grocery application with instant messaging and group chats using React Native and WebSockets.
- Implemented JWT and OAuth for security.

Bestudent (E-Learning Platform) | Live
- Created role-based dashboards for instructors and students with Clerk authentication.
- Integrated Stripe for payments and Mux for streaming.

ProManage (Project Management Tool) | Live
- Designed a Kanban task board reducing bottlenecks by 70%.
- Added notifications, secure invites, and email alerts.

EDUCATION

B.Tech in Information Technology – PSIT College of Engineering (2020–2024)
Intermediate – Oxford Model Senior Secondary School (2018–2020)
